

TECHNICAL INFORMATION BULLETIN
FOR THE USE OF Venerate XC® BIOINSECTICIDE
Green Apple Aphid and Rosy Apple Aphid on Pome Fruit

FIFRA Section 2(ee) Recommendation

This recommendation is made as permitted by Section 2(ee) of FIFRA, as amended, and has not been submitted to or approved by the U. S. Environmental Protection Agency.

FOR USE IN ALL STATES WHERE CROP AND PEST(S) EXIST AND WHERE 2(EE) RECOMMENDATIONS ARE RECOGNIZED.

Venerate XC®
EPA Reg. No. 84059-14

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Crop	Target Insect	Application Method	Product Use Rate per Application	Application Instructions
Pome Fruit	Rosy Apple Aphid, Green Apple Aphid	Foliar (Ground application)	2 quarts per acre	Applications should begin as soon as aphids are present and continue until activity is no longer present. Additional applications, if needed, should be made on an interval not to exceed 7 days. For rosy apple aphid an initial application at the pink stage of bloom is recommended. Use of a non-penetrating spreader-sticker to promote good coverage and adhesion is recommended.

Venerate XC® has a **pre-harvest interval (PHI)** of **0 days**.
Do not enter or allow worker entry into treated areas during the **restricted-entry interval (REI)** of **4 hours**.

All applicable directions, restrictions and precautions on the EPA-registered label are to be followed.

This FIFRA Section 2(ee) recommendation contains new or additional directions for use of this product, which may not appear on the package label. Read and carefully observe the cautionary statements plus all the other information appearing on the product label.

This recommendation must be in the possession of the user at the time of pesticide application.
